EXECUTIVE SUMMARY

The Consumer Price Index (CPI) is compiled to indicate average changes in the prices of goods purchased by Tuvalu households nationwide, with quarterly price collections carried out on selected outlets or retailers across Funafuti. The selected items were derived from the HIES of 2015/2016 and the weights were rebased on November, 2019.

This release aims to provide information on the volatility of prices, based on the prices collected for the fourth quarter of 2023. An annual inflation rate of 4.5 percent was observed for this quarter, the average annual inflation rate was 7.2 percent, and the quarterly inflation rate of 0.2 percent.

PRICE TRENDS

Figure 1 below shows the trend of the average annual price index and Figure 2 shows the trend in the annual inflation rate.

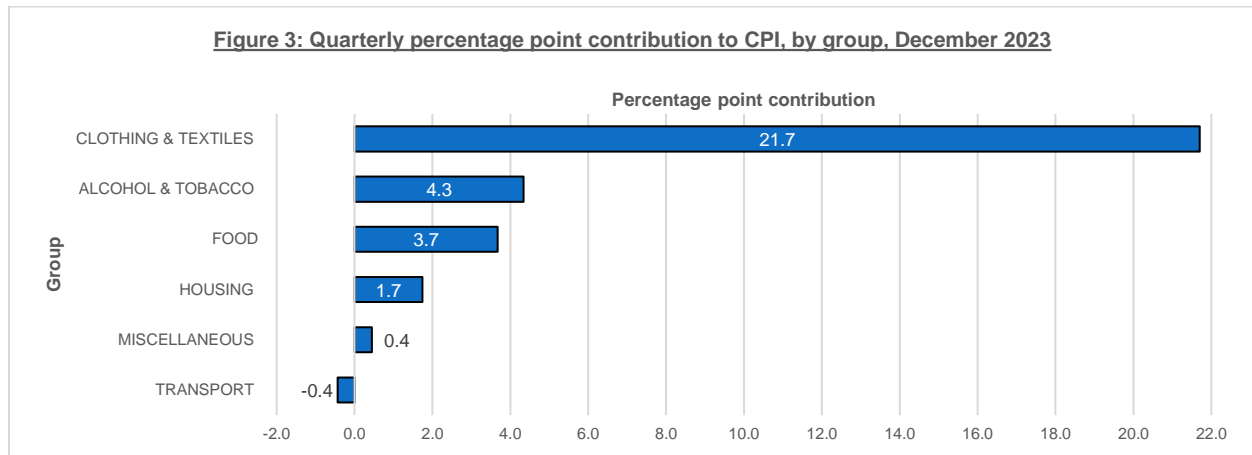

The annual price index shows an increasing trend since 2017, however, a slight increase in the growth-rate of about 12.2 percent was recorded in the period 2021 to 2022 and slowed down to a growth rate of 7.1 percent the following period.

On the other hand, the annual inflation rate displays a more volatile trend which steeply increased after 2020 and peaked to an average inflation rate of 12.1 percent in 2022 then decreased by 40.4 percent to an average annual inflation rate of 7.2 percent in 2023. However, despite the steep decline in the 2023 average annual inflation rate, it can be noted that it is still higher compared to the period between 2017 to 2021, which averages around 3.6 percent.
