EXECUTIVE SUMMARY

The Consumer Price Index (CPI) is compiled to indicate average changes in the prices of goods purchased by Tuvalu households nationwide, with quarterly price collections carried out on selected outlets or retailers across Funafuti. The selected items were derived from the HIES of 2015/2016 and the weights were rebased on November, 2019.

This release aims to provide information on the volatility of prices, based on the prices collected for the second quarter of 2024. An annual inflation rate of 3.2 percent was observed for this quarter, the average annual inflation rate was 4.4 percent, and the quarterly inflation rate decreased by 0.1 percent.

For further information or enquiries, please contact us at statistics@gov.tv, or visit our website at <https://stats.gov.tv/category/economics/consumer-price-index/>.

The next Consumer Price Index for the third quarter of 2024 will be released on the 27th of September, 2024.

Mr. Angus Amasone
Senior Statistician

PRICE TRENDS

Figure 1 below shows the trend of the average annual price index and Figure 2 shows the trend in the annual inflation rate.

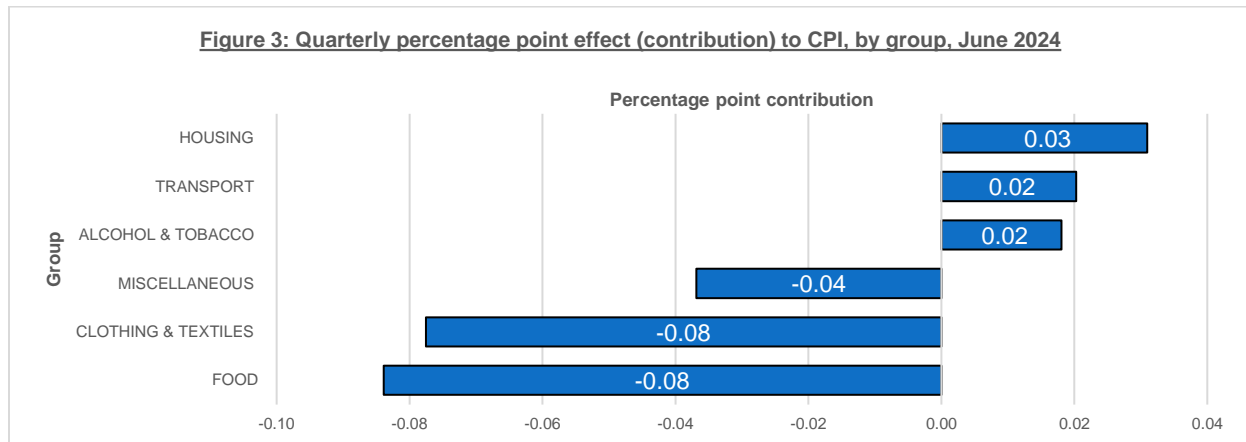

The annual price index shows an increasing trend since 2018, however, an increase in the growth-rate was observed in the period between the second quarter of 2022 to the second quarter of 2023 of about 11.4 percent slowed down significantly to 4.4 percent in the following period.

The annual inflation rate on Figure 2 shows a more volatile trend which steeply increased after 2021 and peaked to an average inflation rate of 11.5 percent in the second quarter of 2023 then decreased by 61.4 percent to an average annual inflation rate of 4.4 percent in the second quarter of 2024. However, despite the declining average annual inflation rate for the period 2023 to 2024, it can be noted that it is still higher compared to the period between 2018 to 2021, which averages around 2.9 percent.
