# Statistical Release

CSD Release No. 04/2025

31<sup>st</sup> October 2025.

## Consumer Price Index – Quarter 3, 2025

[Base Period: November 2019 = 1000]

The Consumer Price Index (CPI) is compiled to indicate average changes in the prices of goods purchased by Tuvalu households nationwide, with quarterly price collections carried out on selected outlets or retailers across Funafuti. The selected items were derived from the HIES of 2015/2016, and the weights were rebased in November 2019.

This release aims to provide information on the volatility of prices, based on the prices collected for the third quarter of 2025. An increase in the annual inflation rate by 3.7 percent was observed for this quarter; the average annual inflation rate was 1.0 percent, and the quarterly inflation rate increased by 0.9 percent.

For further information, please contact us at [statistics@gov.tv](mailto:statistics@gov.tv) or visit our website at <https://stats.gov.tv/>

The next Consumer Price Index for the fourth quarter of 2025 will be released on 21<sup>st</sup> November 2025.

Fakafetai lasi.

Prepared by:

Ms. Papauta Makoi  
**Statistical Officer**

### Key Indicators

<b>Quarterly Change</b>	<b>Q2, 2025</b>	<b>Q3, 2025</b>
All Group Index	1311	1323
Inflation		0.9%
<b>Annual Change</b>	<b>Q3, 2024</b>	<b>Q3, 2025</b>
All Group Index	1276	1323
Inflation		3.7%
<b>Average Annual Change</b>	<b>Q3, 2024-Q3, 2025</b>	
Inflation	1.0%	

## Price Trends

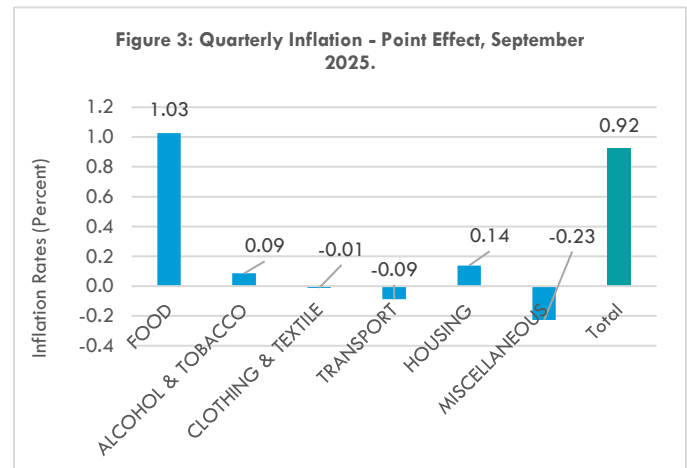

Figure 1 below shows the trend of the average annual price index and Figure 2 shows the trend in the average annual inflation rate for the second quarter of each year from 2019 to 2025.

Overall, Figure 1 implies that on average the prices of goods have continued to increase since the demonstrated period. Figure 2 emphasizes the peak in the average annual inflation rate in 2022 and 2023 due to the increase in prices during COVID 19, which occurred from 2022 until end of 2023 in Tuvalu.

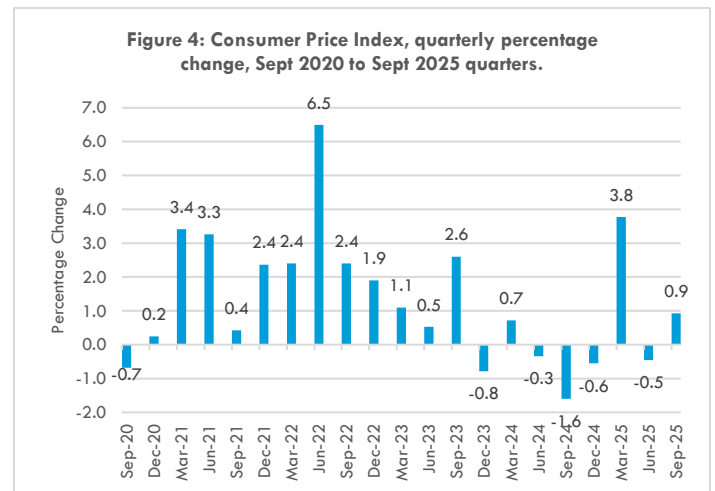

## Quarterly Change

Figure 3 shows the contributions of each group to the changes in the price level (inflation) when compared to the previous quarter 2. The changes below compare the indices of quarter 3, 2025, to quarter 2, 2025.

As illustrated in Figure 3 above, the **Food** group recorded a modest increase of about **1.0 percent**, while small changes were observed across other categories. Offsetting movements, such as slight declines in **Miscellaneous** and **Transport** group, resulted in a total **Quarterly Inflation** of **0.9 percent**. Overall, no major changes were observed during the third quarter.

In the third quarter of 2025, the CPI increased from -0.5 percent in quarter 2, 2025 to 0.9 percent (Figure 4).

## Annual Change

The changes described in this section are a comparison of the price indices for the third quarter of 2025, with that of the third quarter of 2024. Figure 5 demonstrates the contributions of each group to the changes in the price level (inflation) when compared to the same quarter of the previous year.

The **Food** group contributed the most to the Annual Inflation, increasing prices by about **5.3 percent**. This strong upward effect was partly offset by small declines in other categories, particularly **Alcohol and Tobacco (-1.1 percent)** and **Miscellaneous (0.6 percent)**. As a result, the overall **Annual Inflation Rate** stood at **3.7 percent**.

For the 12 months to June 2025, the CPI inflation rate increased by 1.4 percent (Figure 6).
