Statistical Release

CSD Release No.05/25

31st Oct 2025.

Migration Statistics – First Biannual 2025

JAN-JUN 2025 KEY OBSERVATIONS

- Jan - Departure exceeds Arrivals
- Feb - Lowest record for Arrivals, Departures remain consistent.
- Mar - Arrivals increased, Departures elevated to its highest record in 2025.
- Apr - Arrivals reached its peak, Departures declined drastically.
- May - Arrivals dropped sharply, Departures increased.
- Jun - Equal number of Arrivals and Departures.

HIGHLIGHTS

- **JAN-JUN 2025 COMPARED TO JAN-JUN 2024;**
- Total Arrivals increased by 14.8%.
- 20.2% increase in outbound travel.
- Total Visitors increased by 16.12%
- The Total Resident Departures increased by approximately 24.47%

Introduction

Migration patterns play a vital role on the economic, political, and social development of Tuvalu. This report aims to provide an analysis of the estimated international movement of Tuvalu's population during the first half of 2025. Migration statistics are crucial in understanding these dynamics, providing critical insights for population estimates and projections.

This analysis is based on data collected by the Tuvalu Central Statistics Division (CSD) from the Tuvalu Immigration Office. It will address visitor arrivals, residential departures, and the various purposes associated with these travels.

Ms. Grace Alapati

Government Statistician

Total Arrivals

2024-2025: The first half of 2025 showed a strong 14.8% increase in total arrivals (4,339) compared to 2024 (Figure 1). However, the year 2025 was marked by extreme volatility, with a major shift in both the dominant traveling gender and the peak arrival month. The two years show fundamentally different traveller 2123 profiles and seasonal patterns.

As depicted in Figure 1 above, both years share the common pattern with February having the lowest Total Arrivals.

2025:

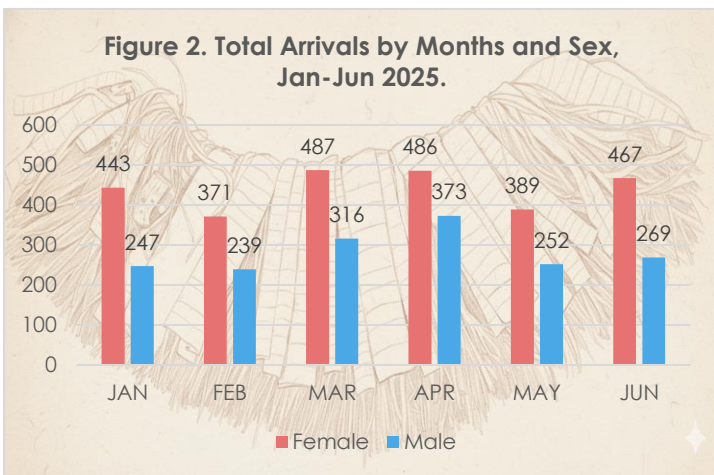

Figure 2 above demonstrates the following information, and it shows;

- Female arrivals significantly outnumbered Male arrivals in the first six months, accounting for 2,643 of the total 4,339 arrivals.

- A peak in Total Arrivals was recorded in April (859), followed by a sharp drop in May 2025.
- Volatility vs. Stability:
 - 2025 showed high volatility, with large swings between the lowest month (February, 610) and the peak (April, 859).
 - When compared to the first biannual 2024 (Figure 1), there is a relatively stable movement, showing a gradual and steady increase from the lowest month (February, 528) to the peak (June, 691).

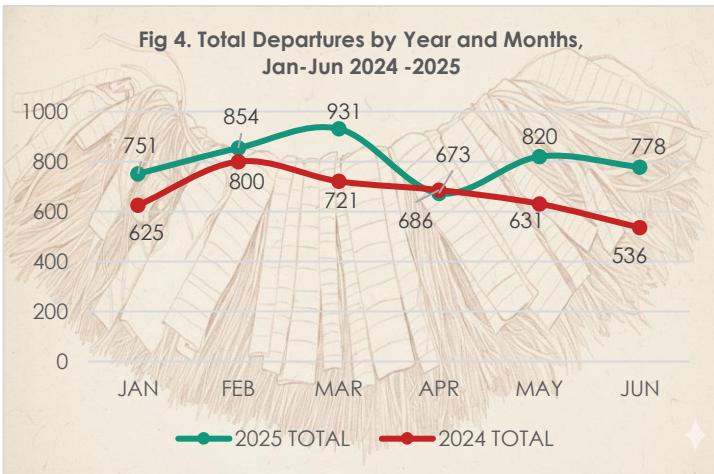

Visitors 2025:

Tuvalu's regional countries including Australia, New Zealand and Fiji accumulate to 1,063 of Visitors Arrivals in Tuvalu.

Additionally, the 'Other' category including other pacific countries total up to 885 visitors to Tuvalu (please refer to Table A4 in the appendix)

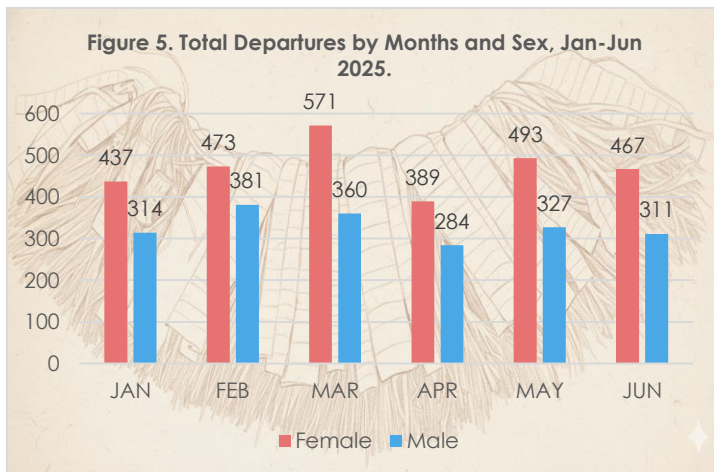

Total Departures

2024-2025: Figure 4 above demonstrates the following, and it shows.

- Total departures the first biannual 2025 (4,807) were significantly higher than in 2024 (3,999), representing a 20.2% increase in outbound travel.
- The month with the highest volume of departures shifted from February (800) in 2024 to March (931) in 2025.
- The 2025 monthly trend was much more volatile (High peak in March, deep trough in April) compared to the 2024 trend, which showed a steady decline after an early peak.
- The month with the least departures was June (536) in 2024, and April (673) in 2025.

2025:

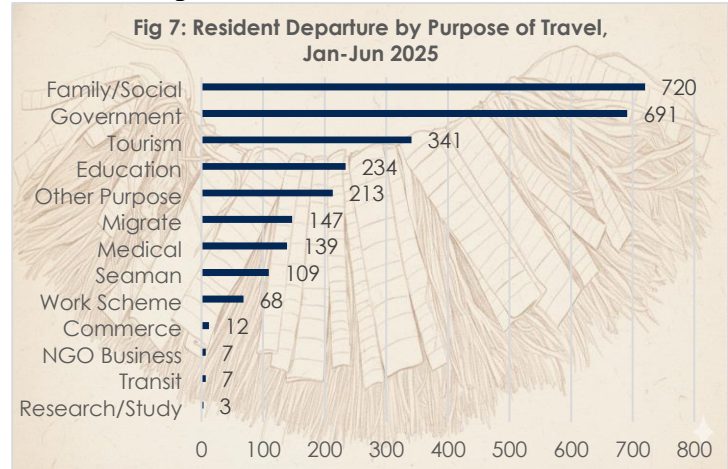

- The 2025 monthly trend was much more volatile (High peak in March, deep trough in April) compared to the 2024 trend (Figure 4),

which showed a steady decline after an early peak.

- Female departures significantly outnumbered Male departures in the first six months, accounting for 2,830 of the total 4,807 arrivals.

Resident Departures 2025:

Based on Figure 7 above, over half of all movement is driven by two main reasons: Family/Social and Government travel, which account for 26.75% and 25.68% of the total 2,691 departures, respectively.

In addition, other frequent reasons of departure include Tourism (12.7%) and Education (8.7%). This suggests that over 70% of resident outflow is related to personal and official responsibilities.

The total Resident Departures increased by approximately 24.47% from 2024 to 2025.

Departures for the purpose of Migrate increased fourfold, from 39 in 2024 to 147 in 2025.
