Statistical Release

CSD Release No. 01/2026

09th February 2026.

Consumer Price Index – Quarter 4, 2025

[Base Period: November 2019 = 1000]

The Consumer Price Index (CPI) measures changes in the average prices of goods and services purchased by households in Tuvalu. Prices are collected quarterly from selected retail outlets in Funafuti, and expenditure weights are derived from the 2015/16 Household Income and Expenditure Survey (HIES), rebased to November 2019 = 1000.

In the fourth quarter of 2025, the All-Group CPI increased to 1336, up from 1323 in the previous quarter. This represents:

- Quarterly inflation: 1.0 percent
- Annual inflation (Q4 2024–Q4 2025): 5.3 percent
- Average annual inflation (2025): 2.8 percent

For further information, please contact us at statistics@gov.tv or visit our website at <https://stats.gov.tv/>

The next Consumer Price Index for the first quarter of 2026 will be released on 30th April 2026.

Fakafetai lasi.

Key Indicators

Quarterly Change	Q3, 2025	Q4, 2025
All Group Index	1323	1336
Inflation		1.0%
Annual Change	Q4, 2024	Q4, 2025
All Group Index	1269	1336
Inflation		5.3%
Average Annual Change	Q3, 2024-Q3, 2025	
Inflation	2.8%	

Price Trends (2019 – 2025)

Figure 1 below shows the trend of the average annual price index and Figure 2 shows the trend in the average annual inflation rate for the fourth quarter of each year from 2019 to 2025.

The CPI trend since 2019 shows a sustained upward movement in the general price level. The sharpest increase occurred during 2022, when average annual inflation peaked at 12.1 percent, largely associated with global supply chain disruptions and elevated import costs during the COVID-19 period.

Since 2023, inflationary pressures have moderated considerably. By Q4 2024, annual inflation had slowed to 0.4 percent, indicating a period of relative price stability. However, the increase to 5.3 percent in Q4 2025 suggests a renewed build-up in price pressures, particularly in food-related categories.

While inflation remains well below the 2022 peak, the upward movement in late 2025 warrants continued monitoring.

Quarterly Change (Q3 to Q4 2025)

Figure 3 shows the contributions of each group to the changes in the price level (inflation) when compared to the previous quarter. The CPI rose by 1.0 percent in Q4 2025, slightly higher than the 0.9 percent recorded in Q3 2025.

Main Contributors;

🏠 Housing Group (+0.62 percentage points)

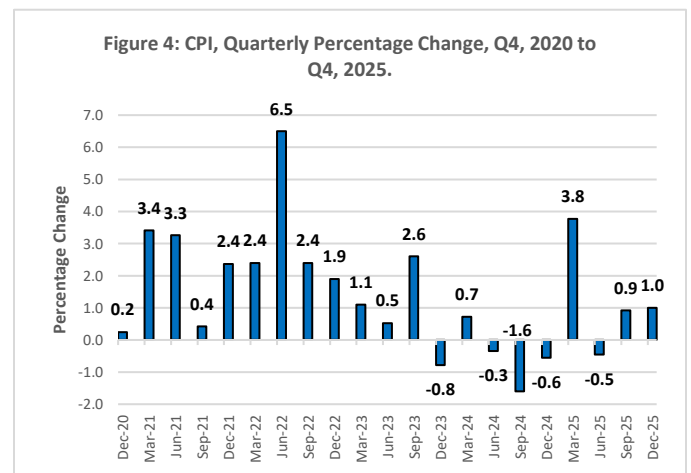

Housing was the largest contributor to quarterly inflation, primarily driven by increases in house maintenance materials and selected household appliances.

🍔 Food Group (+0.35 percentage points)

Food prices recorded a moderate increase, with notable movements in meat, dairy produce, and cereals.

👕 Other Groups

Small increases were observed in Transport and Clothing, while Miscellaneous recorded a marginal decline.

In the fourth quarter of 2025, the inflation increased from 0.9 percent in quarter 3, 2025 to 1.0 percent (Figure 4).

Annual Change (Q4 2024 to Q4 2025)

The changes described in this section are a comparison of the price indices for the fourth quarter of 2025, with that of the fourth quarter of 2024. Figure 5 demonstrates the contributions of each group to the changes in the price level (inflation) when compared to the same quarter of the previous year.

Annual inflation accelerated to 5.3 percent, compared to -1.8 percent recorded in Q4 2024 (Figure 6). This marks a significant turnaround from the low inflation environment observed in 2024.

Major Drivers

Food Group (+6.5 percent contribution)

Food was the primary driver of annual inflation. Within this group:

- i. Meat prices increased significantly (32.8 percent year-on-year)
- ii. Dairy produce rose by 19.0 percent
- iii. Cereals increased by 19.9 percent
- iv. Vegetables and fruits rose by 12.3 percent

These movements reflect higher import costs and potential supply adjustments throughout the year.

Housing (+0.51 percentage points)

Housing contributed moderately to annual inflation, mainly from house maintenance and utilities.

Alcohol & Tobacco (-1.5 percent)

This group partially offset overall inflation, driven largely by declines in tobacco prices.

Sectoral Observations

Food

Food prices remain the most significant source of price variability in Tuvalu's CPI. Given the heavy reliance on imported food items, international price movements and freight costs continue to influence domestic inflation trends.

Transport

Transport prices remained relatively stable during 2025, with ship and air fares unchanged in Q4. Private transport costs showed minimal quarterly movement.

Housing

The Housing group recorded notable increases in maintenance materials and appliances. This may reflect replacement cycles and cost adjustments in imported construction and household goods.

Miscellaneous

Mixed movements were observed across education, telecom, and cleaning materials. Overall, this group exerted minimal influence on inflation.

TABLE 1: INDICES AND INFLATION RATES

YEAR	QUARTER	INDEX		INFLATION RATE (%)
