Statistical Release

CSD Release No. 16/2026 — 21th October 2026.

Consumer Price Index – Quarter 3, 2026

[Base Period: November 2019 = 1000]

The Consumer Price Index (CPI) measures changes in the average prices of goods and services purchased by households in Tuvalu. Prices are collected quarterly from selected retail outlets in Funafuti, and expenditure weights are derived from the 2015/16 Household Income and Expenditure Survey (HIES), rebased to November 2019 = 1000.

In the third quarter of 2026, the All-Group CPI decreased from 1360 in Q2 2026 to 1355 in Q3 2026.

This represents:

- Quarterly inflation: -0.4 percent
- Annual inflation (Q3 2025 – Q3 2026): 2.4 percent
- Average annual inflation (October, 2025 - September, 2026): 3.4 percent

For further information, please contact us at statistics@gov.tv or visit our website at https://stats.gov.tv/

The next Consumer Price Index for the fourth quarter of 2026 will be released on 18th December 2026.

Prepared by:

Mr. Simeona B Simeona
Statistical Officer

Mr. Angus Amasone
Government Statistician

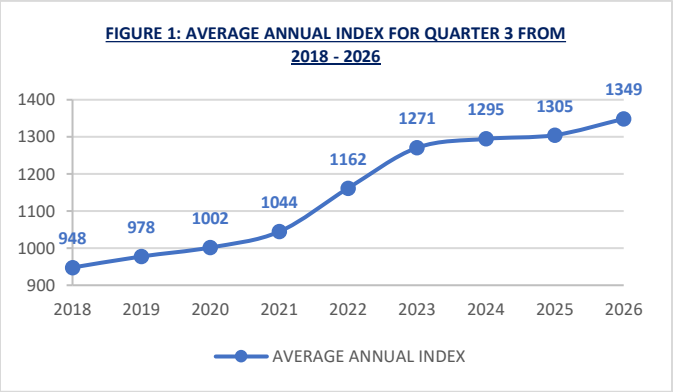
Key Indicators & Highlights

Quarterly Change	*Q2, 2026*	*Q3, 2026*
All Group Index	1360	1355
Inflation		-0.4%
Annual Change	*Q3, 2025*	*Q3, 2026*
All Group Index	1323	1355
Inflation		2.4%
Average Annual Change		*Q4, 2025 - Q3, 2026*
Inflation		3.4%

- **CPI decreased by 0.4% during Q3 2026.**
- **Annual inflation slowed to 2.4% in Q3 2026. A notable drop from 3.7% in Q2 2026.**
- **Lower transport and food prices were important contributors to the quarterly decline.**
- **Housing prices increased during the quarter, partly offsetting the decline in the overall CPI**

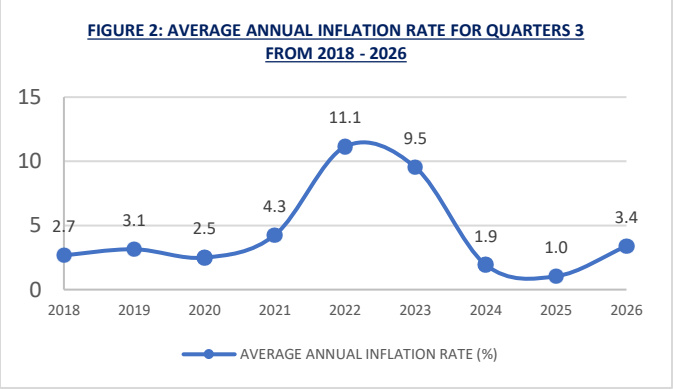
Price Trends (2018 – 2026)

Figure 1 below compares the average annual price index for the third quarters of each year, from 2018 to third quarter of this year, 2026.



The average annual Consumer Price Index (CPI) continued to rise, increasing from 1,305 in the third quarter of 2025 to 1,349 in 2026. This indicates a continued increase in the overall price level of goods and services.

Figure 2 compares the average annual inflation rate for the third quarters of each year from 2018 to the third quarter of 2026.

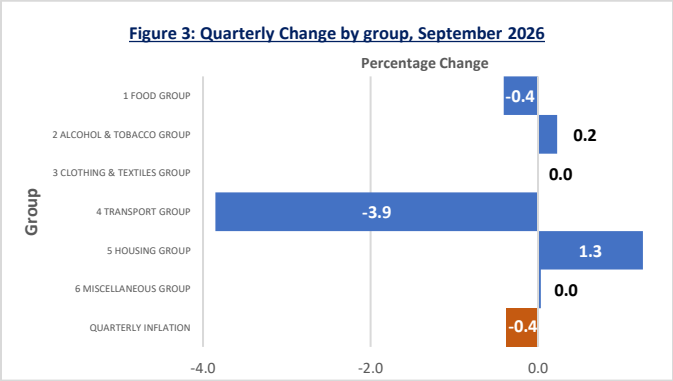


However, average annual inflation slowed from 3.8 percent in Q2 2026 to 3.4 percent in Q3 2026. Despite this slowdown, inflation remained higher than the 1.0 percent recorded in Q3 2025, but well below the peak of 11.1 percent in 2022.

Overall, consumer prices remained elevated, although the pace of price increases moderated slightly during the third quarter of 2026.

Quarterly Change (Q2 2026 to Q3 2026)

Figure 3 shows the quarterly changes of each CPI group compared with the previous quarter.



Main Drivers:

Transport Group (-3.9%)

Transport recorded the largest quarterly decline, mainly driven by a 4.1 percent decrease in private transport prices.

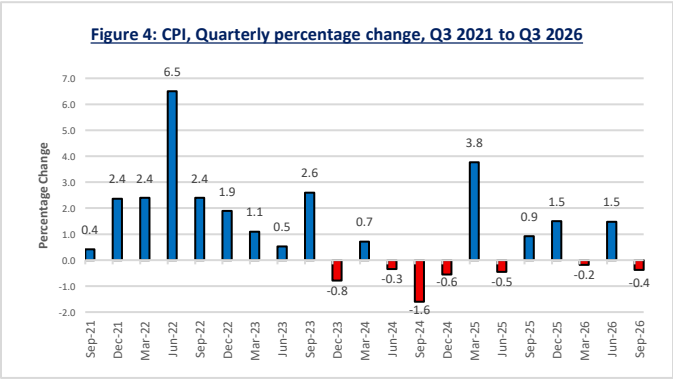
Food Group (-0.4%)

Food prices declined slightly, mainly influenced by lower prices for beverages (-1.2%), sugar and sweets (-2.9%), and dairy produce (-2.5%).

Housing Group (+1.3%)

Housing recorded a quarterly increase of 1.3 percent, mainly driven by higher house maintenance costs mainly timber & Paint (+6.2%) and fuel and electricity prices (+1.2%).

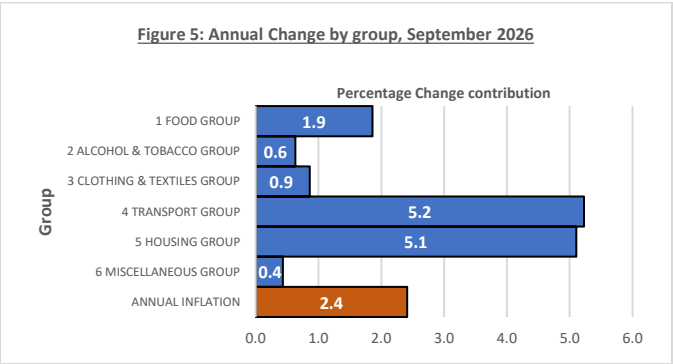
Quarterly inflation decreased by 0.6 percent this quarter, from a 1.5 percent increase in quarter 2, 2026 (Figure 4).



Annual Change (Q2 2025 to Q2 2026)

The changes described in this section are a comparison of the price indices for the third quarter of 2026, with that of the third quarter of 2025. Figure 5 demonstrates the annual changes in the price level of each group when compared to the same quarter of the previous year.

Figure 5: Annual Change by group, September 2026



Major Drivers

Transport Group (+5.2 percent)

The Transport Group recorded the largest annual increase of 5.2 percent, although this was lower than the 8.5 percent recorded in Q2 2026. The increase was mainly influenced by the following subgroup:

- **Private Transport** increased by 5.7 percent, compared with 9.2 percent in Q2, indicating slower price growth. Ship and air fares remained unchanged.

Housing Group (+5.1 percent)

The Housing Group increased by 5.1 percent annually, compared with 4.7 percent in Q2 2026. This was influenced by the following subgroups:

- **Household** Appliances increased by 39.4 percent, slightly higher than the 37.3 percent recorded in Q2.
- **House Maintenance** increased from 4.4 percent in Q2 to 4.8 percent in Q3, indicating a slight rise in prices.
- **Fuel** and **Electricity** increased from 1.8 percent to 2.2 percent, reflecting faster price growth.

Food Group (+1.9 percent)

The Food Group recorded slower annual growth, declining from 4.4 percent in Q2 to 1.5 percent in Q3 2026. Price movements varied across the following subgroups:

- **Meat** inflation slowed from 14.3 percent in Q2 to 5.4 percent in Q3.
- **Fish** prices increased by 6.4 percent, slightly lower than the 7.9 percent recorded in Q2.
- **Dairy Produce** inflation declined from 4.7 percent to 2.1 percent, indicating slower price growth.
- **Beverages** recorded a price decline of 3.1 percent, while Sugar and Sweets decreased by 6.6 percent, helping to moderate overall food inflation.

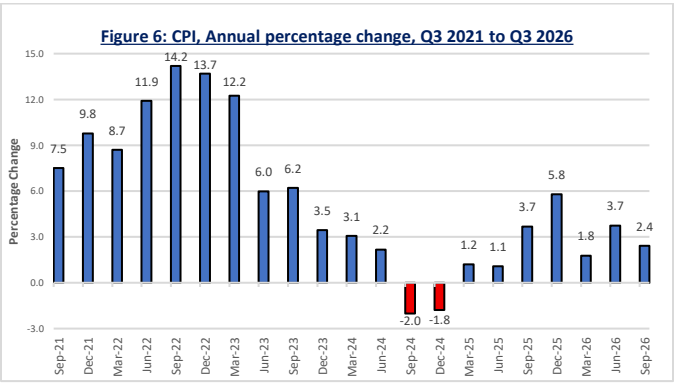
Alcohol & Tobacco Group (+0.6 percent)

The Alcohol & Tobacco Group recorded a slight annual increase of 0.6 percent, compared with 1.2 percent in Q2 2026. This was influenced by the following subgroups:

- **Alcohol** prices increased by 1.5 percent, slowing from 8.2 percent in Q2.
- **Tobacco** prices remained unchanged compared with Q3 2025, following a 3.2 percent annual decline in Q2 2026.

Overall, annual inflation slowed from **3.7 percent in Q2 to 2.4 percent in Q3 2026**. Transport and Housing remained the main sources of annual price increases, while slower Food inflation helped moderate overall inflation.

Figure 6: CPI, Annual percentage change, Q3 2021 to Q3 2026



Sectoral Observations

Food

The Food Group recorded slower annual inflation, declining from 4.4 percent in Q2 to 1.9 percent in Q3 2026. Meat prices increased by 5.4 percent, compared with 14.3 percent in Q2, while Fish inflation slowed from 7.9 percent to 6.4 percent. Dairy Produce also recorded slower growth at 2.1 percent. Meanwhile, Beverages (-3.1%) and Sugar and Sweets (-6.6%) continued to record price declines, helping to moderate overall food inflation.

Alcohol and Tobacco

The Alcohol and Tobacco Group recorded a slight annual increase of 0.6 percent, compared with 1.2 percent in Q2 2026. Alcohol inflation slowed significantly from 8.2 percent to 1.5 percent, while Tobacco prices remained unchanged on an annual basis, following a 3.2 percent decline in Q2. This indicates slower price growth within the group.

Clothing and Textiles

The Clothing and Textiles Group recorded a slight annual increase of 0.9 percent in Q3 2026, compared with no change in Q2. Clothing prices remained unchanged, while Textiles increased by 11.4 percent annually. Overall, the group showed minimal price movement during the quarter.

Transport

Transport inflation slowed from 8.5 percent in Q2 to 5.2 percent in Q3, mainly due to slower growth in Private Transport prices. Ship and air fares remained unchanged.

Housing

Housing inflation increased from 4.7 percent in Q2 to 5.1 percent in Q3. This was mainly driven by higher prices for Household Appliances, House Maintenance, and Fuel and Electricity, while House Rental remained unchanged.

Miscellaneous

The Miscellaneous Group improved from -1.5 percent in Q2 to 0.4 percent in Q3. Cleaning Materials and Education recorded price increases, while Toiletries declined slightly. Other subgroups remained stable.

Inflation Outlook

In Quarter 3 2026, annual inflation decreased to 2.4 percent from 3.7 percent in Quarter 2, suggesting a slowdown in the increase of consumer prices. Lower prices for food and transportation were the primary cause of the quarterly inflation fall to -0.4%.

Due to slower price rises for meat, fish, and dairy products, food inflation decreased from 4.4 percent to 1.9 percent. While housing Inflation rose marginally from 4.7 percent to 5.1 percent due to rising expenses for fuel and electricity, household appliances, and house maintenance, transportation inflation also decreased from 8.5 percent to 5.2 percent

Although prices are still higher than they were a year ago, overall inflationary pressures have decreased. Future inflation trends will still be influenced by fuel prices, import prices, and the state of the world economy. In order to evaluate pricing changes in the upcoming quarters, it will be critical to keep an eye on these variables.

Looking ahead to Q4 2026, inflation is expected to remain sensitive to changes in international commodity prices, fuel costs and shipping expenses, given Tuvalu's reliance on imported goods. The recent slowdown in Food and Transport inflation may help ease overall price pressures if these trends continue. However, rising Housing costs and possible increases in import prices could place upward pressure on inflation in the coming quarter.
