## **PREFACE**

This Social Statistics Annual report is compiled by the Tuvalu Central Statistics Division (CSD) assisted with data collected from various social stakeholders sources such as the Immigration office, the Health department statistics division and Population estimates data compiled from previous and current on-going census enumeration. Coverage of this Annual report includes Migration Statistics such as Tuvalu's total arrivals and total departures which are collected from the Immigration office and entered into a dataset by the Tuvalu CSD, Vital statistics which are collected from the Health department which includes births and deaths dataset and population estimates segregated by islands, villages, sex and age

With the information provided in this Annual Social report, the Tuvalu CSD aims to accomodate statistical users with the necessary data that they require for their own statistical usage. Also provided in the appendix section are detailed tables linking to the graphs and information presented in this report for further assistance.

In addition, due to incomplete and inconsistent data collected from various sources, certain information catered in this report may require further analysis thus there will be necessary changes to the information presented in the upcoming reports. This is done so in order to convert them into meaningful data.

Sincere gratitude is extended to all CSD staff for the effort in data collection, entering data, analyzing data, and producing statistical information. Lots of appreciation and thanks are dedicated to usual data sources as well for their willingness to continuously share data for analysis.

Ms. Grace Alapati  
**Government Statistician**

## ANALYSES SUMMARY

2021

2022

### 1. VITAL STATISTICS

#### The Births Statistics

1.1 There is a slight decline in total of births in the latter year of 2022.

<i>Total births</i>	276	267
---------------------	-----	-----

1.2 The male births exceeds the female births in both years.

<i>Totals of male births</i>	148	143
------------------------------	-----	-----

<i>Totals of female births</i>	128	124
--------------------------------	-----	-----

1.3 In 2021, October had the highest birth rates, while in 2022, the highest birth rate was in March.

<i>Total births</i>	31	35
---------------------	----	----

<i>Male births</i>	15	18
--------------------	----	----

<i>Female births</i>	16	17
----------------------	----	----

#### The Mortality Statistics

1.4 The mortality rate decreased majorly in 2022.

<i>Total deaths</i>	112	80
---------------------	-----	----

1.5 The total deaths of both male and female has decreased fr the latter year

<i>Totals of male deaths</i>	61	43
------------------------------	----	----

<i>Totals of female deaths</i>	51	37
--------------------------------	----	----

1.6 The month with the highest death rate in 2021 was April with approximately 14 total deaths, while March 2022 was the month with the most occurring deaths.

<i>Total deaths</i>	14	13
---------------------	----	----

<i>Male deaths</i>	6	9
--------------------	---	---

<i>Female deaths</i>	8	4
----------------------	---	---

1.7 Heart complications, severe infection, and respiratory complications were the recognized leading causes of deaths

<i>Deceased with circulatory system complication situations</i>	32	21
---	----	----

<i>Deceased with severe infection situations</i>	9	4
--	---	---

## ANALYSES SUMMARY

### 2. MIGRATION STATISTICS

#### The Arrivals

2.1 There were no arrivals in the first quarter due to COVID 19 restrictions, however Tuvalu began with charter flights in the second quarter of the year allowing limited passengers only to travel back to Tuvalu.

<i>Total Arrivals</i>	445	1,423
-----------------------	-----	-------

<i>Total Visitors</i>	38	244
-----------------------	----	-----

<i>Total annual increase (%) of visitors</i>		542%
--	--	------

<i>Month with the maximum number of visitor arrivals</i>	January(15)	December(112)
--	-------------	---------------

## The Departures

2.2 An increase in total departures is recognized from the first quarter to the second quarter.

<i>Total departures</i>	557	1,653
<i>Total Residents</i>	488	1,394
<i>Total annual increase (%) of residents from the previous year</i>		186%
<i>Month with the maximum number of resident departure</i>	January(118)	December(391)

2.3 The majority of departures were facilitated by air (airline) services.

## ANALYSES SUMMARY

### 3. POPULATION ESTIMATES

3.1 The overall population count in Funafuti exceeds that of all outer islands.

<i>Total population in Funafuti</i>		6,101
<i>Total population in Outer Islands</i>		3,595
<i>Overall Population in TUVVALU</i>	10,000	9,696

3.2 The overall population of Funafuti holds twice the accumulated population of all outer islands. *Fakaifou(1,225)* , *Alapi(1,208)* and *Senala(1,035)* are some of the residential villages with the greatest population in Funafuti.

<i>Total population in Funafuti</i>		6,101
<i>Lofeagai</i>		825
<i>Teone</i>		663
<i>Fakaifou</i>		1,225
<i>Senala</i>		1,035
<i>Alapi</i>		1,208
<i>Vaiaku</i>		426
<i>Tekavatoetoe</i>		614
<i>Amatuku</i>		101
<i>Funafala</i>		4

## 1. Vital Statistics

### 1.1 Overview

This section covers Vital statistics based on data collected from the Health department which includes a monthly analysis from January to December 2022. The Tuvalu Central Statistics Division (CSD) will continue to collect and produce vital statistics on a quarterly basis in order to provide statistical users with the necessary data and information they require.

### 1.2 Graphical Summary:

#### 1.2.1 Births by month, 2022.

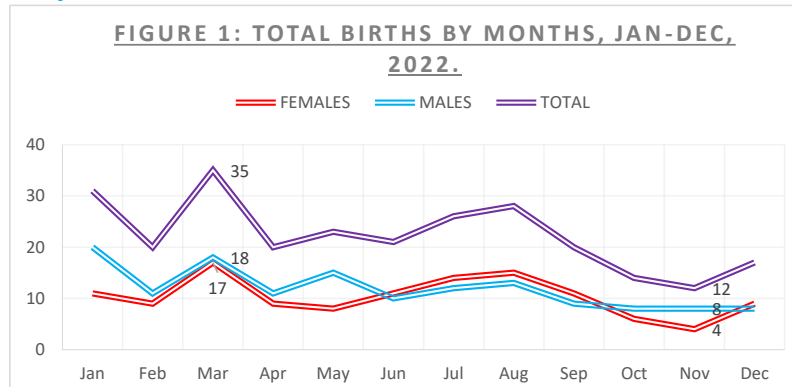

Figure 1 above illustrates the total births by sex distributed throughout the year. March 2022 was the peak month of births, with a total of 35 births, 18 male and 17 female births. The least births occurred in November 2022, with 8 male births and 4 female births.

#### 1.2.2 Total births by Island of birth, 2022.

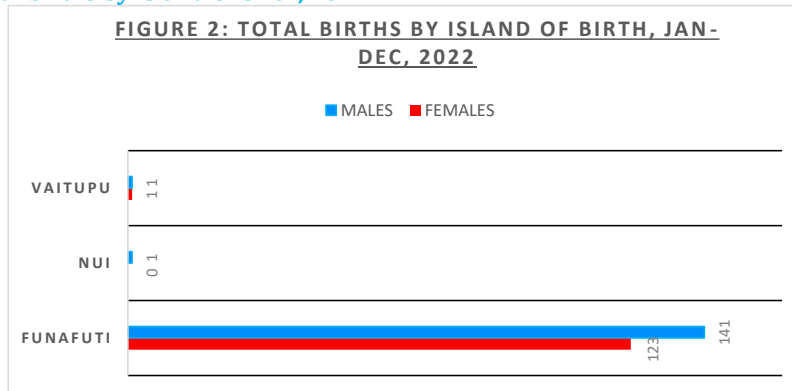

Figure 2 above shows the total births by island of birth from January to December 2022. Funafuti is the island with the most frequent births that have occurred throughout the year of 2022. The reason being for most births to occur in Funafuti is that Funafuti is the capital of Tuvalu, with the highest population, as well as the main branch of hospital being located in Funafuti, therefore many women from outer islands prefer to travel to deliver their babies in Funafuti, Tuvalu.

### 1.2.3 Total births by age of mothers 2022.

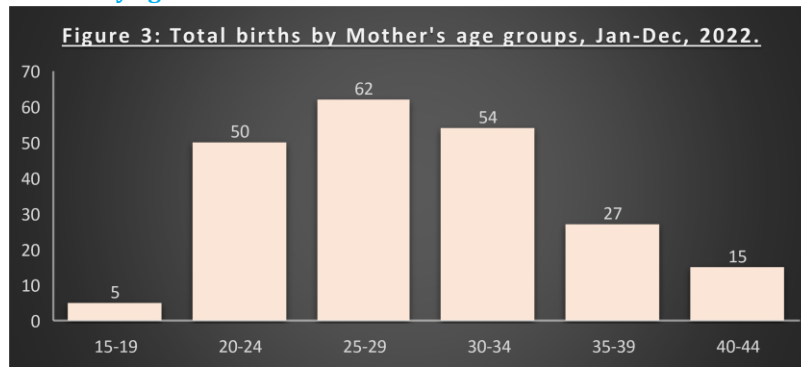

Figure 3 demonstrated above shows the total births from January to December segregated by Mother's age groups. It shows that the most frequent ages of mothers to give birth is between ages 25 to 29 years, which are the common years of marriage and settling down in a family. The least frequent age group of mother's to give birth is between ages 15-19 with a minimum of 5 mother's giving birth.

### 1.2.4 Total Deaths by Months, Jan-Oct 2022.

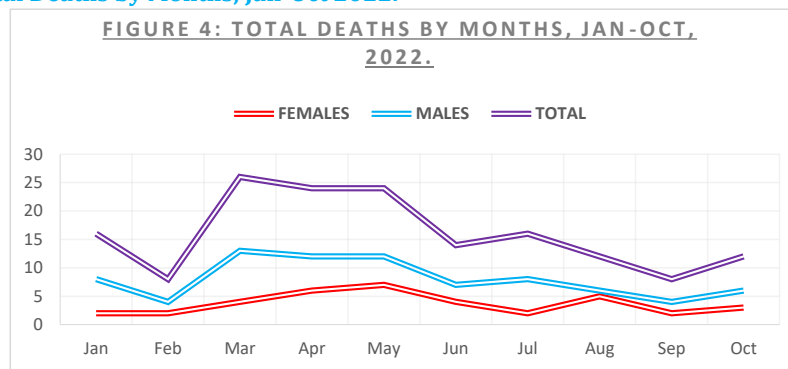

Figure 4 shows the total Deaths by months from January to October 2022. As shown in the figure 4 the trend of deaths from January to October increased mostly in March 2022, while its lowest peak was in February 2022.

*\*Due to incomplete data from the Health department, the Tuvalu CSD will only be able to compile information on Total deaths from January to October 2022.*

### 1.2.5 Deaths by island, Jan-Oct 2022.

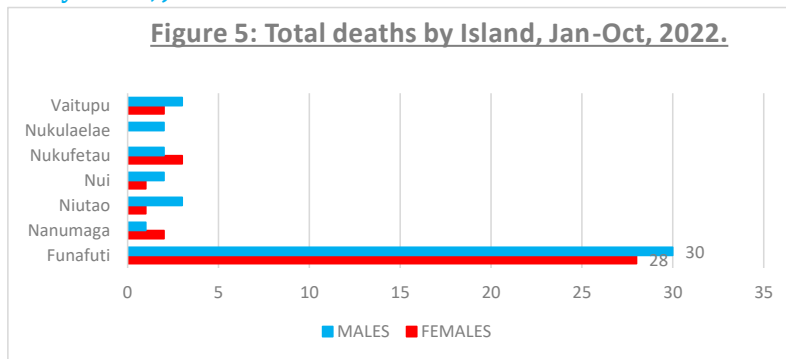

Figure 5 above demonstrates the total deaths by island of occurrence from January to October 2022. It shows that most deaths occur in Funafuti, with a minimum deaths occurring in outer islands as well, for instance, Vaitupu, Nukufetau and Niutao.

### 1.2.6 Total death by Age group, Jan-Jun 2022.

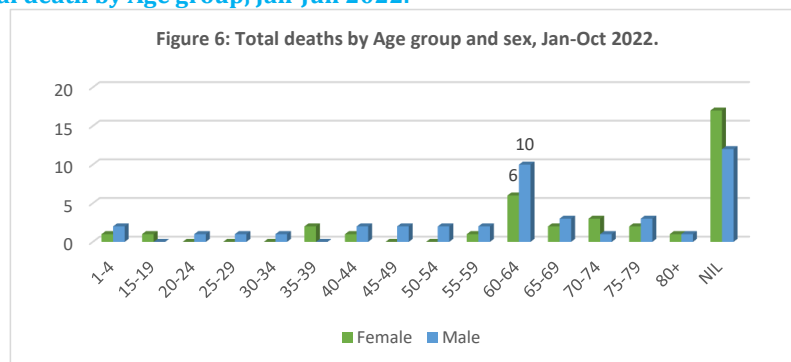

Figure 6 demonstrates the total deaths by age groups by sex from January to October 2022. \*NOTE: Due to an incomplete dataset from Health department records, most deaths are categorised under NIL, which refers to death records with unknown date of birth. Most frequent age group occurrence happens between ages 60 to 64 for both male and female.

### 1.2.7 Simplified causes of death, Jan-Jun 2022.

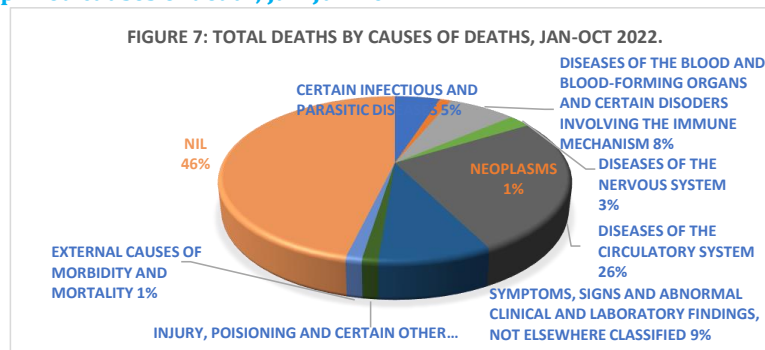

Figure 7 above shows the total causes of death classified by main causes of death classes. The figure above shows that the classification with the most occurring deaths was the diseases of the circulatory system with approximately 26% of total deaths.

## 2. Migration

### 2.1 Overview

This section focusses on statistics that are related to the international movement of the overall population of Tuvalu for the annual year 2022. Migration statistics are fundamental driver of economic, political and social change as they provide resourceful information towards population estimates and projections. With the help of migration data collected and entered by the Tuvalu CSD from the Tuvalu Immigration Office, the analysis below will cover visitor arrivals, residential departures as well as their respective purpose of travel.

As of the third quarter of 2022, travel restrictions which started along with the COVID 19 state of emergency border lockdown in early March 2020 still remained active as new variant of COVID 19 emerges and affecting neighbouring countries in the Pacific region. However, towards the end of quarter 4 2022, travelling restrictions were uplifted and the movement of residents and visitors in and out of Tuvalu returned to normal schedule.

### 2.2 Graphical Summary:

#### 2.2.1 Total Arrivals by Months, Jan-Jun 2022.

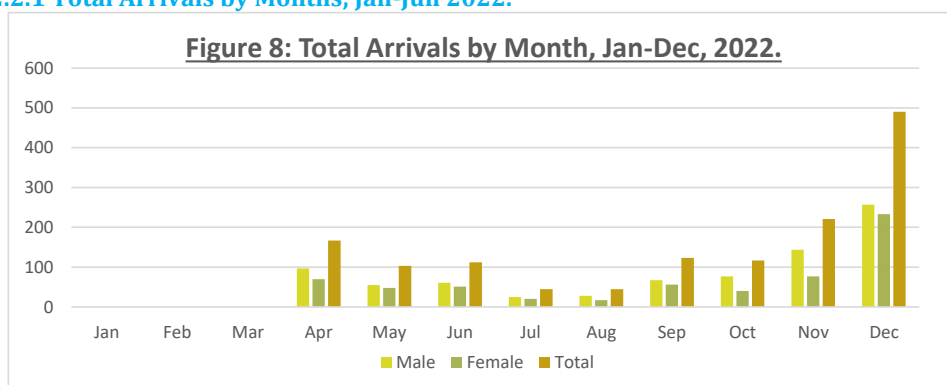

Figure 8 shows the total male and female arrivals into Tuvalu for a 12 month period in 2022. The data combines both resident and visitors arriving into Tuvalu by air and sea mediums. Data for January - March is unavailable due to the Covid-19 border closures. The highest arrivals were recorded in the last quarter of 2022 (with peaks in December 2022) primarily driven by the reopening of borders and running the normal flight schedules, with months of July and August recording the lowest arrivals due to COVID-19 government restrictions on travelling to Tuvalu. The figure also shows there were more male arrivals than females in 2022.

### 2.2.2 Visitor arrivals and purpose of visit

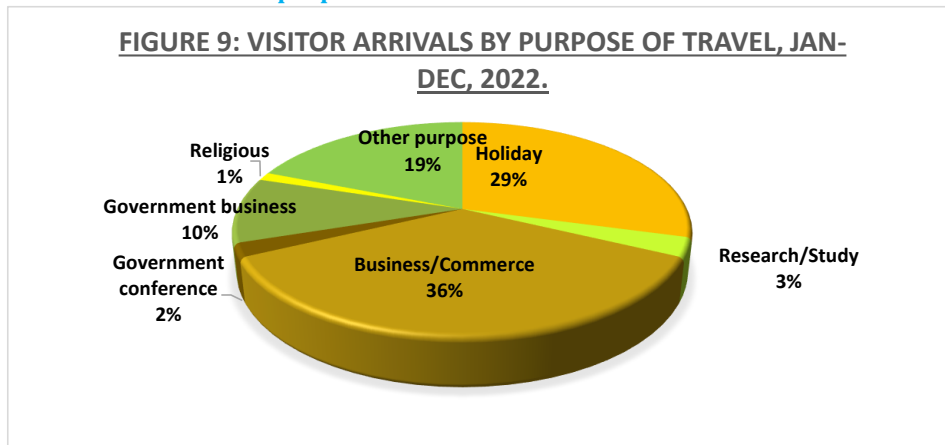

Figure 9 shows the composition of travellers (as a percentage of total arrivals) arriving into Tuvalu based on their purpose of travel for a 12 month period in 2022. The data combines both male and female travellers arriving into Tuvalu. The highest arrivals into Tuvalu in 2022 were for business or commercial purposes (39%), while travelling for the purpose of holiday (29%), other purposes (19%) and government business (10%) accounted for other majority travellers into Tuvalu. Very few people arrived in Tuvalu for religious reasons. The graph does not include data from the months of January, February and March due to no data available for those months.

### 2.2.3 Visitor Arrivals by Nationality, Jan-Jun 2022.

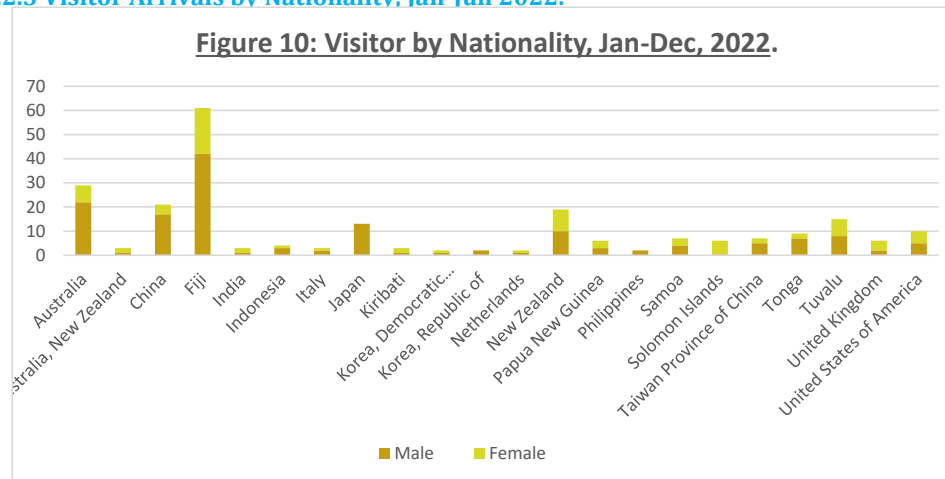

Figure 10 shows total visitor arrivals into Tuvalu over a 12 month period in 2022 based on their Nationality and categorized by sex. The highest arrivals were people of Fijian nationality (61, 42 males and 19 females) followed people of Australian (29), Chinese (21), Japanese (13), New Zealand (19) and Tuvaluan nationalities (15), recording more than 15 arrivals each. Arrivals from the remainder of the countries were 10 or below. Overall more males arrivals were recorded than female from all countries except for people of Solomon Island Nationality where arrivals were only females.

### 2.2.4 Total Departures by Month, Jan-Jun 2022.

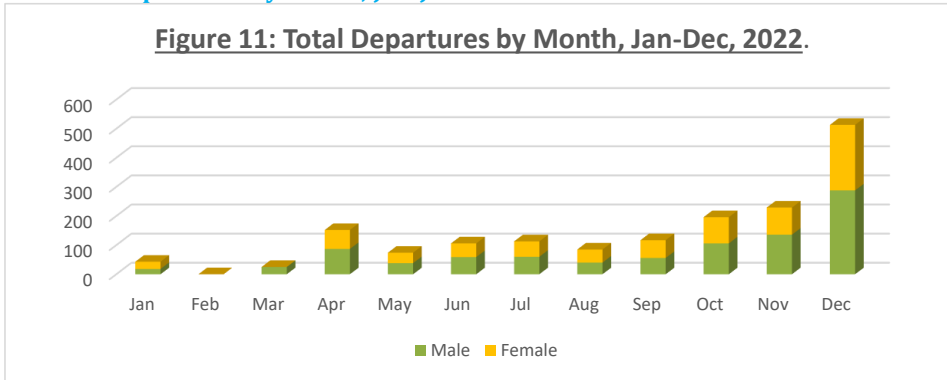

Figure 11 shows the total male and female departures from Tuvalu for a 12 month period in 2022. The data combines both resident and visitors departing Tuvalu. Data for February is unavailable due to Covid-19 border closures. The highest departures were recorded in the last quarter of 2022 (with peaks in December 2022) primarily driven by the reopening of borders, with months of January to March recording the lowest arrivals due to no passengers yet passengers departing from Tuvalu were allowed to travel. This action was part of the state of emergency action plan to restrict COVID-19 from entering Tuvalu borders. The figure also shows overall more males departed from Tuvalu than females in 2022.

### 2.2.5 Resident departure by Purpose of travel, Jan-Jun 2022.

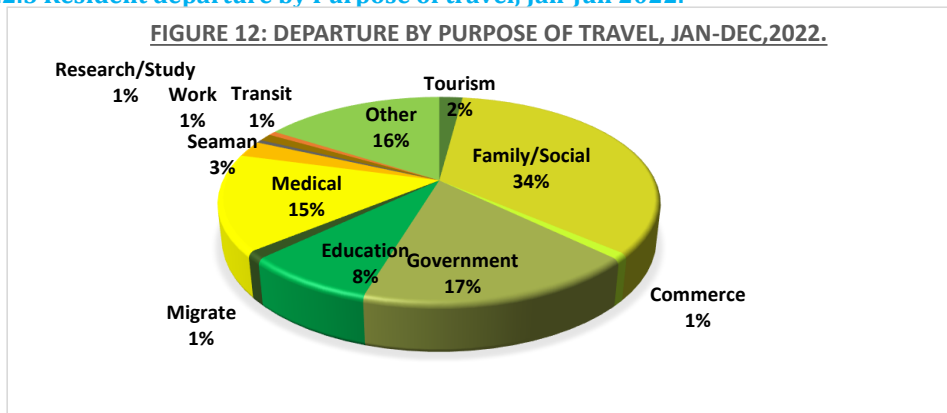

Figure 12 shows the composition of travellers (as a percentage of total departures) departing Tuvalu based on their indicated purpose of travel for a 12 month period in 2022. The data combines both male and female travellers departing Tuvalu. The highest departures from Tuvalu in 2022 were for visiting family/social purposes (34%), while departing for the purpose of government business (17%), other purposes (16%) and for medical reasons (15%) accounted for other majority travellers departing Tuvalu. The graph does not include data for February due to no data available for that month.

### 3. Population Estimates.

#### 3.1 Overview

The population estimates are dependent on the demographic components of change such as the mortality and fertility rate as well as migration and help define the total population size and its characteristics such as age, sex, and education level. This helps policymakers to project the overall population's demand for food, water, and energy and to forecast future demographic characteristics. This final section covers Population estimates of Tuvalu by area and age group.

#### 3.2 Graphical Summary:

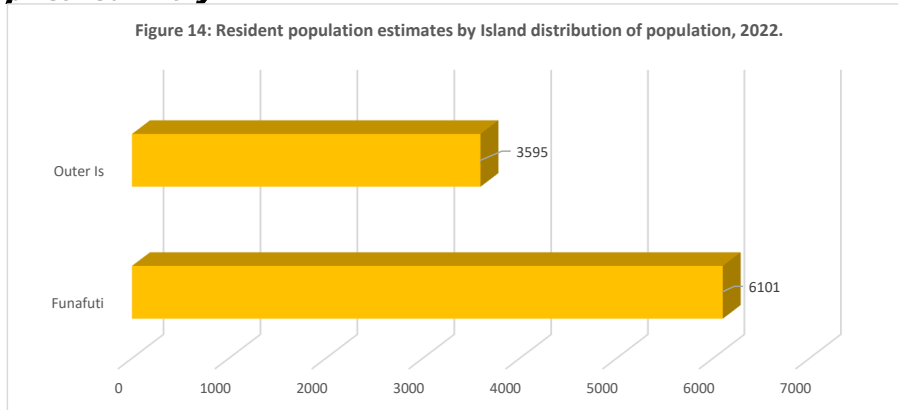

Figure 13 above demonstrates the distribution of residents by Islands. The illustration shows that there are approximately 6,101 residents living in the capital Funafuti, while 3,595 residents reside in the rest of outer islands inclusively. The overall population in Funafuti still exceeds the outer islands population accumulated.

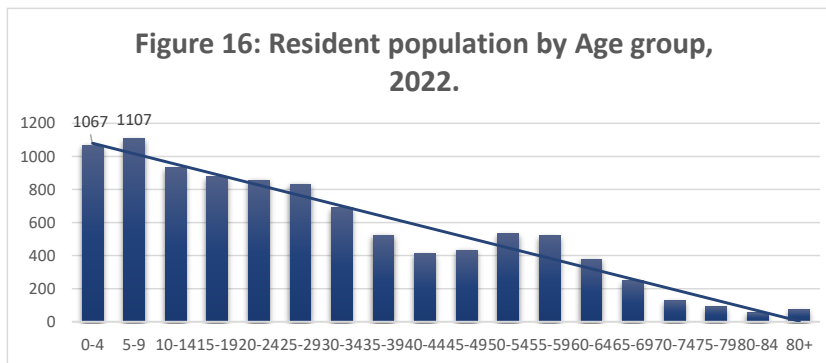

Figure 16 depicts the resident population distributed into age groups 2022. The overall population of Tuvalu is dominated by younger age groups with the most frequent ages 5-9 (1,107 residents) dominating the overall resident population. The second most frequent age group is ages between 0-4 years with approximately 1,067 residents. As seen in the trend of age groups in Figure 15 above, as the ages increase, the overall population of residents decreases with the least frequent ages between ages 80 to 84 years.

APPENDIX TABLES
